

Electronic Document Scanning

Benefits

Reduce errors

Office users know which documents are needed and managers can quickly detect when needed documents are not being scanned

Get paid quicker

Insurance submissions are more accurate since all required documents are accessible immediately after an appointment completes

• Help the environment

Stop copying and transporting all those paper documents from your offices to headquarters

• Improve service

All patient and appointment documents are accessible by authorized users

Features

Custom document setup

The list of documents you need is created and indicates which documents are twosided or multi-page

Required document list

For each appointment, the user sees a list of required and optional documents based on insurance, patient and appointment details

Document flow for insurance submission

Upon appointment completion, documents are routed to your billing office for insurance submission

Document tracking

The daily appointment schedule list shows the current document status for each appointment

Requirements

• Opti-Schedule

• TWAIN-compatible document scanner

Scanner must support TWAIN and be accessible to the office user via either USB or local area network. We can help you select a compatible scanner or test your preferred scanner.
